Author Index for Volume 43

Kenzi Akiyama On projective planes of order 12 with a collineation group of order 9 133
M. Atici The integrity of small cage graphs 39
S.G. Barwick Unitals and replaceable t-nests 115
Endre Boros On split and almost CIS-graphs 163
Zachary Bradshaw Minimum cycle bases for direct products of $K_2$ with complete graphs 127
N.E. Clarke Seepage in directed acyclic graphs 91
Ricardo Corrêa About a Brooks-type theorem for improper colouring 219
R. Crawford The integrity of small cage graphs 39
Chandra Dinavahi Diagonally switchable 4-cycle systems revisited 231
Lynne L. Doty Constructing a large class of supertough graphs 191
Peter Dukes Quasi-embeddings and intersections of latin squares of different orders 197
Ömer Eğecioğlu On Böttcher’s mysterious identity 307
R.A. El-Shanawany Orthogonal double covers of complete bipartite graphs by the union of a cycle and a star 281
C. Ernst The integrity of small cage graphs 39
Kevin K. Ferland Constructing a large class of supertough graphs 191
Stephen Finbow The Firefighter Problem: a survey of results, directions and questions 57
S. Finbow Seepage in directed acyclic graphs 91
S.L. Fitzpatrick Seepage in directed acyclic graphs 91
Vladimir Gurvich On split and almost CIS-graphs 163
Rongxia Hao The genus distributions of 4-regular digraphs 79
Frédéric Havet About a Brooks-type theorem for improper colouring 219
M.S. Higazy Orthogonal double covers of complete bipartite graphs by the union of a cycle and a star 281
Qiongxiang Huang A new expression for the adjoint polynomial of a path 103
M.M.M. Jaradat Minimum cycle bases for direct products of $K_2$ with complete graphs 127
Sascha Kurz Integral point sets over finite fields 3
Ruying Liu A new expression for the adjoint polynomial of a path 103
Yanpei Liu The genus distributions of 4-regular digraphs 79
Gary MacGillivray The Firefighter Problem: a survey of results, directions and questions 57
Colton Magnant A note on the path cover number of regular graphs 211

The official abbreviation, in accordance with Mathematical Reviews, for the title of the Australasian Journal of Combinatorics, is

**Australas. J. Combin.**

Published for the
Combinatorial Mathematics Society of Australasia (Inc.)
by the
Centre for Discrete Mathematics and Computing,
The University of Queensland,
Queensland 4072,
Australia.

FAX: +61 7 3365 1477
e-mail: ajc@maths.uq.edu.au
Internet: http://ajc.maths.uq.edu.au/
SUBSCRIPTION INFORMATION

Publication dates: Three volumes per year (February, June and October).
ISSN number: 1034–4942.

All rates below are in AUSTRALIAN dollars.

Annual subscription rates for 2009 (three volumes), including postage:

- Australia $240
- New Zealand, economy air mail $250
- Asia, economy air mail $255
- Elsewhere, economy air mail $260

The price of a single volume is $75 (without postage), $85 (within Australia, including postage) or $90 (outside Australia, including postage).

An individual subscriber who is also a member of the CMSA (Inc.) is entitled to a discount of $10 per volume off the above figures, so $30 less per year.

Payment method: Cheque or bank draft in Australian dollars, payable to “CMSA–AJC”.
Also Visa or Mastercard payment available.

We regret that we are unable to give agency discounts.

Back issues: Volumes 1 – 42 are available.
Back issues over four years old are available free at http://ajc.maths.uq.edu.au

NOTE: Our preferred minimum period of subscription is for one year. This will cover three volumes.
